

Free Binairo for reMarkable

HOW TO SOLVE

Fill every empty cell with a 0 or a 1 so the finished grid follows all three rules below.

- No more than two of the same number may sit next to each other in a row or column (0-0-0 and 1-1-1 are both forbidden).
- Each row and each column must end up with an equal number of 0s and 1s.
- No two rows are identical, and no two columns are identical.
- Bold cells are given; every puzzle has one solution, reachable by logic with no guessing. Tap a puzzle on the Index to jump to it. Tap Answers to check, then Index to go back.
