

Free Kakuro for reMarkable

HOW TO SOLVE

Fill every white cell with a digit 1-9. Clue cells are split by a diagonal: the number above the diagonal is the ACROSS sum for the run to its right, the number below the diagonal is the DOWN sum for the run beneath it.

- Digits in a single run (across or down) cannot repeat.
- The digits in each run must add up to its clue sum.
- Use the sums together to narrow down each cell's digit.
- Tap a puzzle on the Index to jump to it. Tap Answers to check, then Index to go back.
