

How to Sudoku

THE RULES

Fill the grid so that every row, every column, and every 3×3 box contains the digits 1–9 exactly once.

EXAMPLE (TARGET CELL)

The empty cell must follow three rules:

----- Row: it must be a digit not already in this row.

----- Column: it must be a digit not already in this column.

----- Box: it must be a digit not already in this 3×3 box.

KEY IDEA

Each empty cell can only be a digit that doesn't appear in its row, its column, or its 3×3 box.
